

AIRSAFE PURIFYING FUNCTION FOR AIR WITH 98% LESS VIRUSES AND BACTERIA*

**INNOVATIVE TECHNOLOGY
FOR BETTER AIR HYGIENE**

* Confirmed by an internationally recognised accredited laboratory under specific indoor conditions. Virus: Influenza A virus A/PR8/34 H1N1. Bacteria: Staphylococcus albus 8032. For full information, please visit tesy.com.

** Confirmed by an internationally recognised accredited laboratory under specific indoor conditions. Report on the electric convector's impact on the emission of harmful substances (ozon).

*** Patent pending technology, according to European patent applications EP 21161635.4 and EP 20472002.3

- AirSafe is an innovation, developed by TESI, which ensures healthier home environment, by exterminating viruses, bacteria and fungi in the air.
- AirSafe is proven to be completely safe for people, pets and plants, as the UVA light exists naturally in the atmosphere.
- The technology combines the energy emitted by the UVA module with the one of the heating element.
- AirSafe is the perfect solution for families with children, people with allergies and for everyone, who would like to have a better air hygiene at home.
